To Whom It May Concern:

Truston Technologies began working with Apex Freight Services in September 2010 when we had to ship some very large and heavy dolphin frames. These frames weighed from 34,000lbs to 65,000lbs and were also over width and over height loads. Once they began moving our shipments, I gained a healthy respect for their staff with the professional manner in which we were treated as a customer. I was able to make a call and know that my order was taken care of and given the 'white glove' treatment.

From the beginning of that project to the end, I never had to worry about the little things. Their dedicated and courteous staff was always available when I needed them. Our customer was equally pleased with our freight provider.

As our relationship has grown, we still use Apex Freight because they have what it takes to get the job done: determination, dedication, and drive to provide us with the best possible solution for our transportation needs. They have the leadership, experience and our trust to get the job done.

Apex Freight is a leading transportation logistics expert that continues to grow in many routes of the country. From coast to coast, they continue to expand their services and I know they will be there for us whenever we need them.

Best Regards,

Jarett N. Lusk
